3. Shirley's Way will fund the initial pot with a Jackpot of \$20,000.00 and the winning ticket will get half the total pot. Tickets are \$2 each with no limit on the number of tickets that can be purchased. All tickets will be sold online via www.JokersWildLIVE.com. The person who picks the card with the Joker underneath will win half the pot #HALFthePOT.

HOW DO YOU PLAY?

4. The card number selected by using calculator.net will be flipped. If the card flipped is the Joker, the **WINNER** will receive fifty (50%) of the jackpot. The remaining portion of the funds will go to Shirley's Way to fund its charitable mission. If a Queen of Hearts is flipped the ticket holder will win \$1,000 and the game will end. The remaining pot total will roll over to a NEW board with 157 cards.

WHAT IF NOBODY WINS?

5. If the card flipped is **NOT** the Joker a consolation prize of \$100 will be paid for each card flipped. Except for the Queen of Hearts. The Queen of Hearts will pay out \$1,000 as covered in item #4 above.

17. Shirley's Way reserves the right to discard any online purchase if it determines, in its sole discretion, that the purchase may have been affected by hacking, security breaches, bugs or any other type of online tampering. Such purchase may be discarded and ruled ineligible after a winning draw only upon good cause and within 48 hours of the drawing. Due to the nature of online ticket purchases. It is possible, but unlikely that we could have a duplicate ticket situation. This could happen if 2 people purchase tickets at the same exact time. The digital ticketing tool assigns ticket numbers as they are purchased. We often have a large amount of tickets purchased at the very last minute which could cause a duplicate ticket situation. If a duplicate ticket is selected we will enter into a "Showdown". The "Showdown" numbers on our list are directly to the left of the first names on our list of tickets. We will place the "Showdown" numbers in Calculator.net. and a winner will be selected from the identified duplicate ticket holders. See Example in the graphic below. Our "Showdown" numbers are highlighted in red. The numbers 8-11 are just for illustration in this example and could be different numbers during the actual drawing. IE: 8 (lower limit) and 11 (upper limit) would be entered in Caluculator.net and a winner would be generated.
